High-risk critical incidents don't occur every day, but when they do, officers will be looking for you to lead. However, the conventional training that law enforcement leaders receive has often been bogged down in complicated ICS processes and lacked the type of practical tools that are useful in a crisis.

This course is full of easy-to-understand tools that will help you make sense of confusing and rapidly unfolding incidents and implement a safe tactical plan. Our instructors will present examples of how they used the same tools in real-world incidents.
